

qnect

WORKS WITH
CHROMECAST

Indoor Multifunctional camera | Full HD 1080P | Night light |
With sound and temperature sensor | Motion tracking | microSD

QN-IPC05

Connects directly to your home Wi-Fi network

5m clear night view and night light option

Full HD 1080P image quality

2-way communication

5V DC USB 1000mAh

SD + Cloud storage (optional)

Advanced motion and sound detection

Combine in "Flows"

Temperature sensor

Magnetic base

Specifications

| | |
|------------------------|---|
| Wireless connection | WiFi |
| Frequency range | 2400 - 2484 MHz |
| Communication protocol | TCP/IP,HTTP,DHCP,DNS |
| Wireless encryption | WEP/WPA/WPA2 |
| Radio transmit power | +20 dBm |
| Antenna gain | - 3 dBi |
| Power | USB Micro |
| Input voltage | 220 - 240V AC |
| Input voltage | 5V DC 1000mA |
| Lens | 2.4 mm |
| Image chip | 1/4" CMOS |
| Image quality | 1080P |
| Megapixel | 2MP |
| Viewing angle | 100° |
| Video codex | H.264 |
| Video format | Encrypted |
| Frame rate | 15 fps - 25fps |
| Used Bandwidth | 32 kbit/s ~ 2 Mbit/s |
| Motion detection | Camera motion detection |
| Night vision | 5m |
| Functions | Advanced Motion detection Microphone and speaker Sound detection Night light and Lullaby's |
| Storage | Micro SD 2 ~ 64 Gb (class 6) |
| Cloud storage | Optional |
| App platform | iOS & Android |
| IP rating | IP20 |
| Operating temperature | -20 ~ +45° C |
| Operating humidity | 20% ~ 85% |
| Power consumption | 5W |
| Color | White |
| Dimensions | 67 x 58 mm (83x128x64mm) |
| In the box | 1x camera 1x base 1x Rubber Teddy case Installation material 1x USB cable 1x 5V DC adaptor |

Features

- # Plug & play: Connect to your Wi-Fi network in 3 easy steps without the help of a Gateway or software.
- # FHD resolution for very clear images (1080P)
- # Watch what is happening at home and see live what happens. Know when sound is detected. Listen and speak with two-way communication.
- # Advanced motion detection: Set up a specified motion area and/or select if the camera only detects humans.
- # Take a photo or movie in Full HD yourself and save it via your smartphone or automatically records a video on motion detection (via MicroSD card - not included - or optional cloud storage)
- # With integrated night light. Can be triggered on motion detection. Infrared night vision of 5 meters.
- # Integrated Lullaby songs and additional rubber teddy case. use this camera for in childrens rooms.
- # Can be linked to other "qnect home" products: Allow the "qnect home" lights or plug to switch on when motion is detected.
- # Compatible with Google Home or Amazon Alexa: "Cast" live image on a compatible device, by asking your assistant.

Commercial

With this "qnect home" indoor camera you always know who is (unnecessarily) in your house, wherever you are. As soon as it detects movement or sound, you will receive a push message on your smartphone. You can see live images and listen what's going on, without being at home.

But thanks to its sound detection, temperature sensor, night light option and lullaby sound speaker you can also use this camera as a children or baby monitor. The included Teddy case makes it a less "camera" like product within the room.

Full HD (1920x1080 pixels) footage is recorded on MicroSD or optional cloud storage, which gives even more flexibility. You don't need more than your existing WiFi network to install and connect your camera. Mount it indoors and you are ready to use.

This camera has a viewing angle of 100° and accurate smart motion detection. Select the area for motion detection and choose if only humans need to be detected. If needed, The camera will automatically start recording and send a push notification to your smartphone. Thanks to the built-in microphone and speaker, you can even hear what's happening and talk via your smartphone.

Combine this camera and other "qnect home" products together in one app, without the hassle of complicated installations. In this case you can switch on your "qnect home" lamps or smart plug with motion or sound detection, so you can conveniently switch on a floor lamp automatically when there is movement. And this without you having to do anything. In addition, use the products with any "cast" device (via Google Home or With Amazon Alexa). Handy, right !
